

EL DVR Cloud setup

Our new EL series DVR have new function that can upload images to cloud storage. You will need to apply a Dropbox account.

1. Go to Dropbox website and click “**Sign Up**” to apply new Dropbox account.

2. Enter your first name, last name, e-mail and password then click “**Sign Up**”.

3. Go to DVR's "**Main menu**"

4. Select "**Device**"

5. Select "**Cloud Storage**" and enable Cloud Storage function

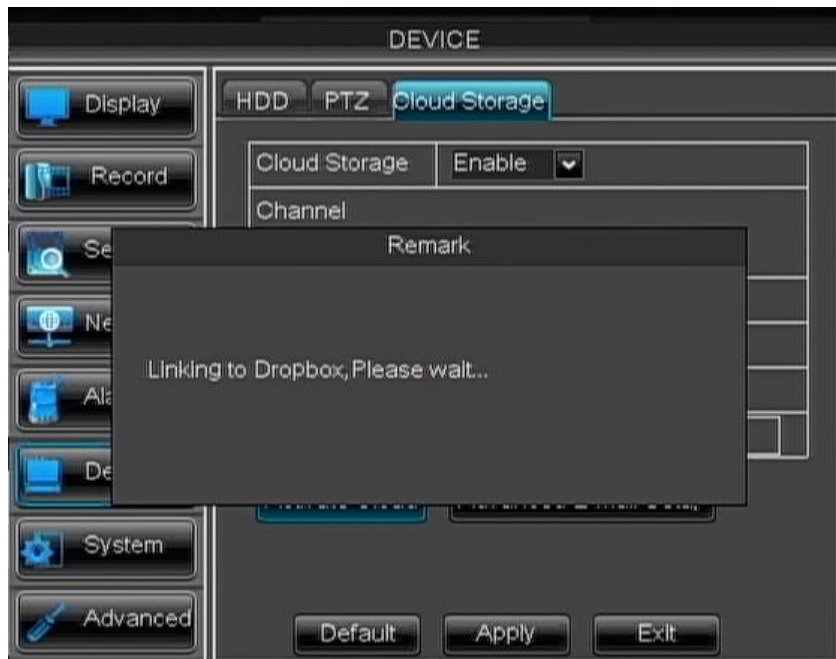

6. Select CH camera you want to upload picture, set time trigger, set DVR name and set Dropbox email. Click “**Apply**” when finished.

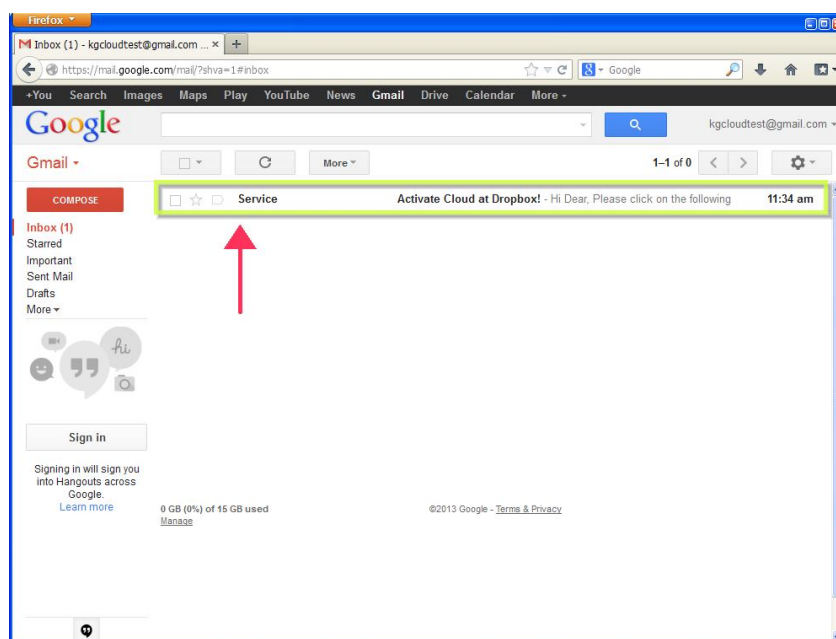

7. Click “**Activate Cloud**” to activate DVR cloud function. DVR will send activation email to your email box. You must activate email within 3 minutes or you need to try again.

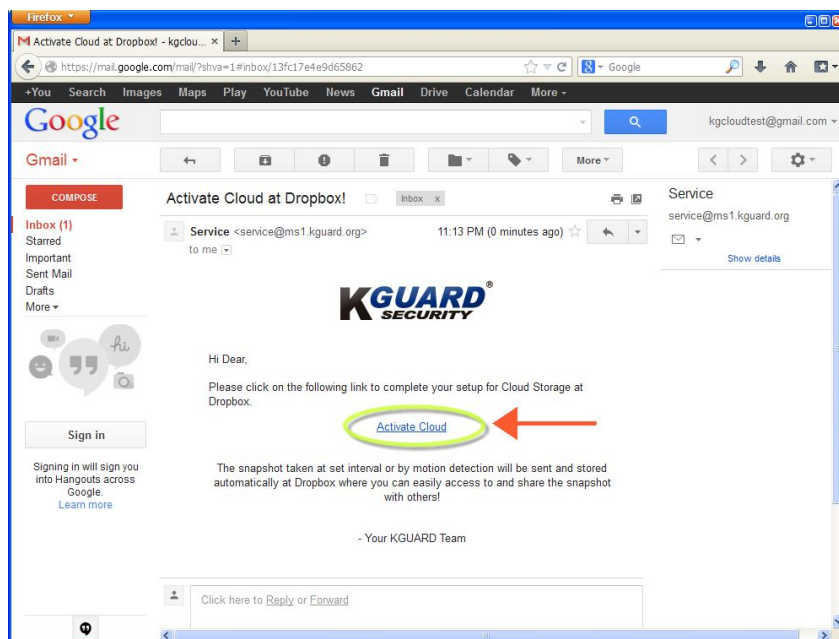

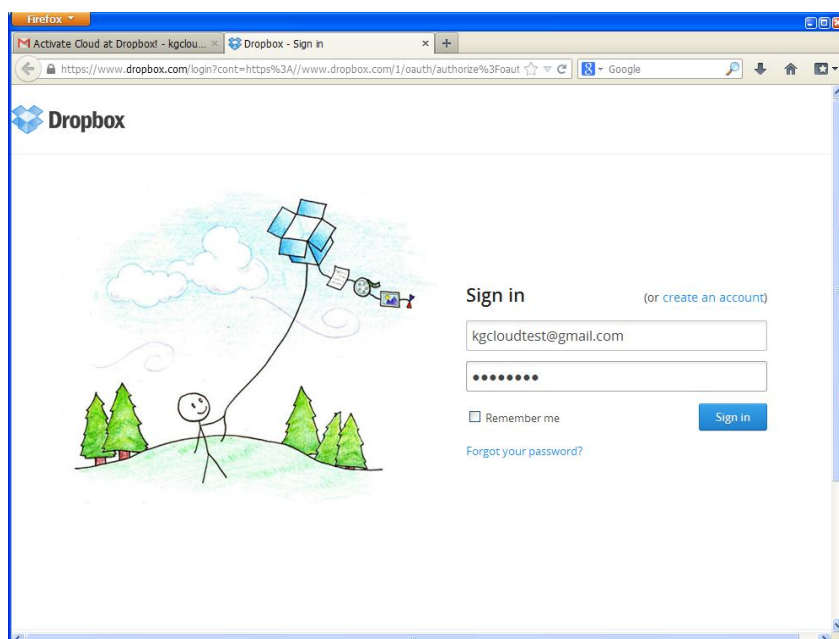

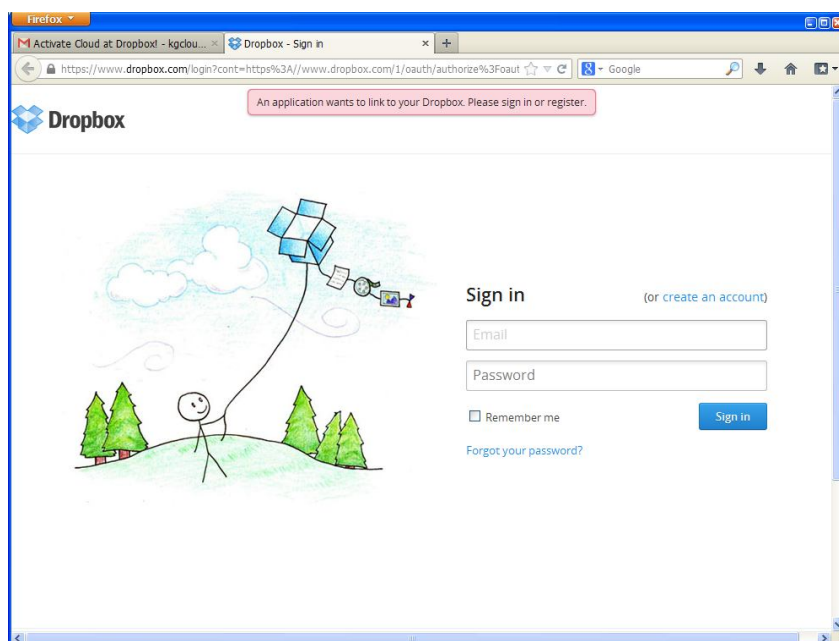

8. You will see an email title “**Activate Cloud at Dropbox**”

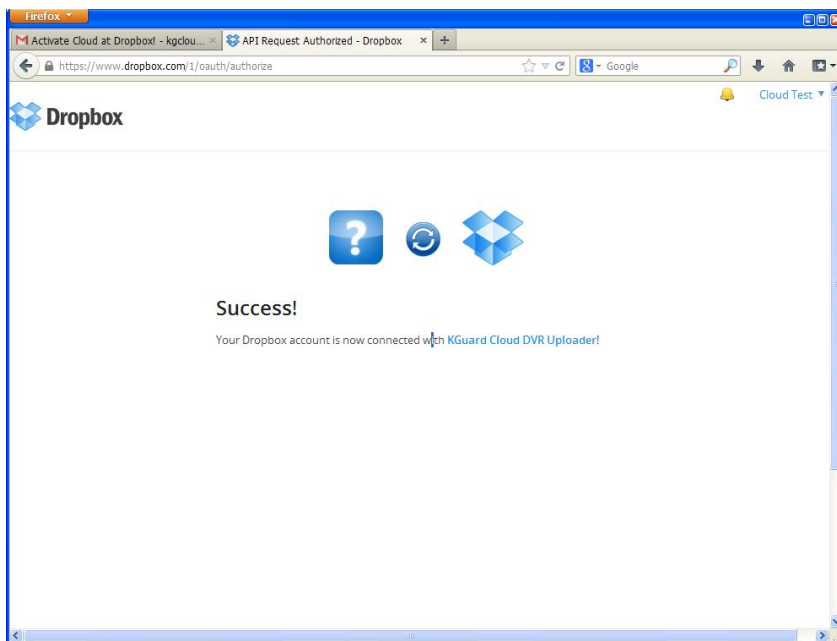

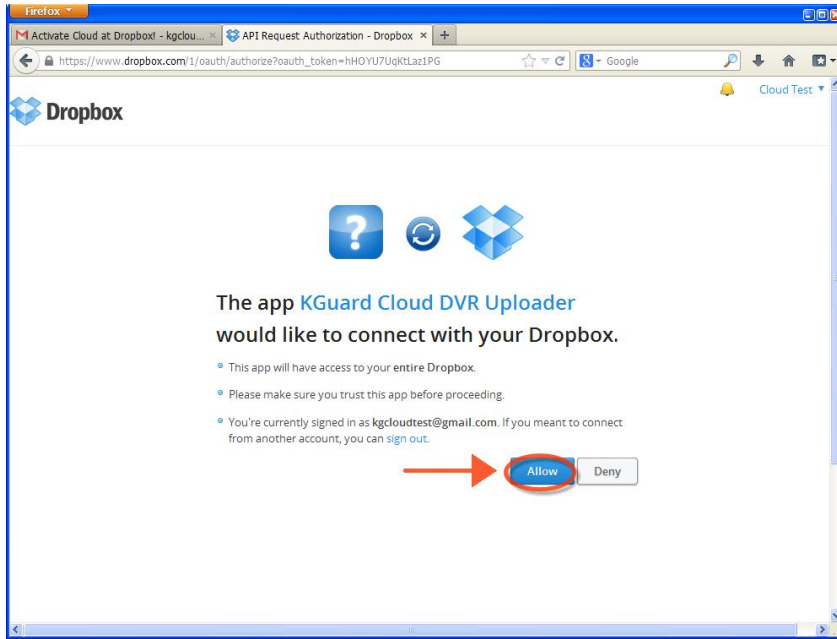

9. Click “Activate Cloud” link in email

10. It will open Dropbox in web browser. Please use same Dropbox account you setup in DVR to login.

11. Please click “**Allow**” for KGuard Cloud DVR Uploader to connect with your Dropbox account. If you finish within 3 minutes, it will display a success message.

12. After EL DVR cloud function is activate successfully, DVR will upload picture to your Dropbox account.
