

KViewQR setup guide

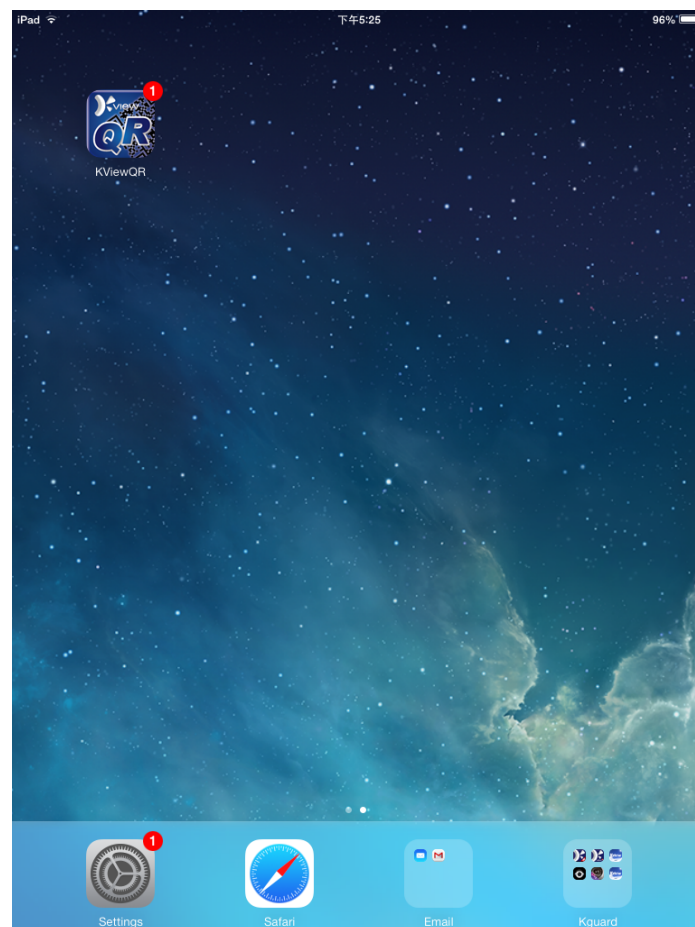

You can use KViewQR app to scan QR code on Mars Home device to see camera video from remote on your smartphone/tablet. No need to setup complex network setting.

Lead-In:

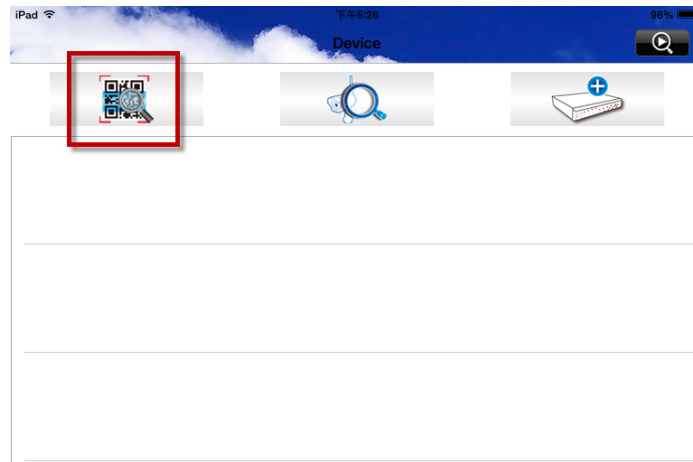

- Please check your Mars Home network service is normal (For example: DVR have network IP address, DDNS test success...).
- Please install QR code scan app on your smartphone/tablet.

KViewQR setup guide: (We use iOS app for example guide)

Step 1: Please install “KViewQR” app on your smartphone/tablet just like picture below:

Step 2: After KViewQR app install complete, please run it. Please tap “QRcode” icon on left side to scan QR Code.

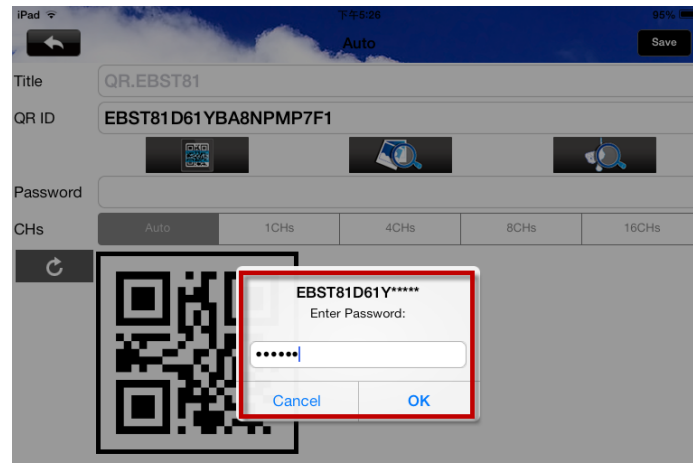

Step 3: Scan QR Code on Mars Home device

Step 4: After scan complete, it will pop up password window. Please enter your DVR's password in “**Password**” field. Please click “**OK**” when you finish.

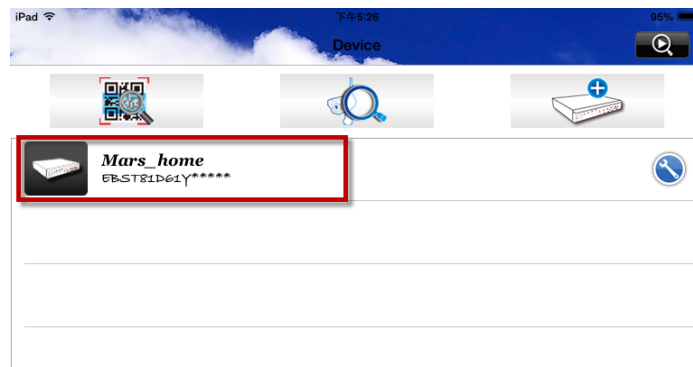

※ **Please enter admin account's password.**

Step 5: Please enter a name that can identify your device and click “**Save**” to save it.

Step 6: After setup complete, go back to device list page and tap your device to view video.
